

## ❖ DESCRIPTION

The USB 3.0 to Gigabit Ethernet adapter allows you to add a network interface to your computer via a USB 3.0 port. Ideal for older computers or new thin notebooks without an Ethernet port to provide networking features, the Gigabit Ethernet capability makes this USB-to-Ethernet adapter faster and more reliable than most wireless connections. It is backward compatible with usb 2.0.

## ❖ FEATURES

Max Transmission rates Gigabit (1000Mbit/s) Ethernet with USB 3.0

More Stable Network Connection than wifi

Small size for portability, ideal for Notebooks,Ultrabooks or Macbook

Universal Compatibility,available on Windows or Mac OSX computers

## ❖ CONNECTOR TYPE

USB 3.0 Male to RJ45 Female
